A CRM APPLICATION FOR THE CHAI Shop & Co

Project Documentation

1. ABSTRACT

Customer Relationship Management (CRM) plays a vital role in improving customer satisfaction and business efficiency. This project, "A CRM Application for TheChaiShop&Co," focuses on developing a Salesforce-based CRM system to manage customer, employer, and enterprise data effectively. The application automates order processing, billing calculations, and customer communication, reducing manual effort and errors. It provides real-time reports and dashboards that help management analyze sales performance and make informed decisions. By replacing traditional manual record keeping with a centralized cloud-based solution, the system enhances data accuracy, operational efficiency, and overall customer engagement.

2. INTRODUCTION

2.1 Project Overview

The project titled "A CRM Application for The Chai Shop & Co" focuses on designing and implementing a Salesforce-based Customer Relationship Management (CRM) system to efficiently manage customer, employer, and enterprise data. The application automates sales calculations, organizes customer interactions, and provides insightful reports and dashboards to support business decisions.
The CRM system replaces manual record keeping with a centralized, cloud-based solution that improves accuracy, productivity, and customer engagement.

2.2 Purpose of the Project

The purpose of this project is to:
• Streamline customer and employer data management
• Automate order quantity and billing calculations
• Reduce manual errors in sales processing
• Enable real-time reporting and dashboards
• Improve customer engagement through automated email notifications

3. PROBLEM STATEMENT

TheChaiShop&Co currently relies on manual and semi-digital methods to manage customer records, sales orders, and billing details. This approach leads to incorrect calculations, data duplication, delayed reporting, and inefficient customer communication. Sales representatives face difficulties in handling orders accurately, managers struggle to monitor sales performance in real time, and customers do not receive timely updates or personalized offers. Therefore, there is a need for an automated, secure, and scalable CRM system that can streamline data management, automate billing processes, and provide real-time insights to improve business operations and customer satisfaction.

4. IDEATION PHASE

4.1 Problem Analysis

User	Trying to Do	Problem	Reason	Feeling
Sales Representative	Manage orders & billing	Incorrect calculations	Manual process	Stressed
Store Manager	Monitor sales	Delayed reports	Data scattered	Confused
Customer	Receive offers	No timely updates	No automation	Undervalued

4.2 Empathy Map Canvas – Target Users

• Sales Representatives
• Managers
• System Administrators

Aspect	Description
Think & Feel	Need accurate data
Hear	Feedback from management
See	Multiple registers
Say & Do	Manual data entry
Pain	Errors and delays
Gain	Automation and reports

4.3 Brainstorming Considered Solutions

• Manual system
• Excel-based system
• Web-based CRM
• Salesforce-based CRM (Selected)

Reason for Selection:
Salesforce provides automation, scalability, security, and built-in analytics.

5. REQUIREMENT ANALYSIS PHASE

5.1 Customer Journey Map

1. User Login
2. Access CRM Application
3. Enter Customer Data
4. Generate Orders
5. Automated Billing
6. View Reports
7. Decision Making

5.2 Solution Requirements

Functional Requirements

FR No	Description
FR-1	User Login
FR-2	Custom Object Creation
FR-3	Data Entry
FR-4	Automated Billing
FR-5	Reports & Dashboards
FR-6	Email Automation

Non-Functional Requirements
• Usability
• Security
• Reliability
• Performance
• Availability
• Scalability

5.3 Data Flow Diagram

User → Salesforce UI → Custom Objects → Validation Rules → Flows → Reports → Dashboards

6. PROJECT DESIGN PHASE

6.1 Problem–Solution Fit

The CRM system automates data handling, eliminates manual billing errors, and enables real-time reporting. It ensures faster operations and better customer interaction.

6.2 Proposed Solution

Key features implemented:
• Secure login and role-based access
• Customer, Employer, and Enterprise objects
• Record types and page layouts
• Formula fields for billing
• Validation rules
• Automated email alerts
• Reports and dashboards

6.3 Solution Architecture

Architecture Layers

1. Presentation Layer – Salesforce Lightning UI
2. Application Layer – Flows & Automation
3. Data Layer – Custom Objects
4. Analytics Layer – Reports & Dashboards

7. PROJECT PLANNING & SCHEDULING

7.1 Development Approach

• Agile-based development
• Sprint-wise implementation
• Continuous testing and validation

8. PROJECT DEVELOPMENT PHASE

8.1 Project Flow (Milestones)

1. Developer Account Creation
2. Object Creation
3. Tabs
4. Lightning App
5. Global Picklists
6. Fields & Relationships
7. Page Layouts
8. Record Types
9. Validation Rules
10. Email Templates
11. Flows
12. Reports & Dashboards

9. FUNCTIONAL & PERFORMANCE TESTING

During this phase, system functionality and performance were tested using the Salesforce Lightning interface.

9.1 Functional Testing

The following features were tested successfully:
• Creation of Employer, Customer, and Enterprise records
• Validation rules for Aadhaar, PAN, and phone number
• Record type selection and page layout switching
• Automated order quantity calculation
• Automated total bill calculation
• Birthday email flow execution
• Report and dashboard generation

HI SWETHA,
Thanks for signing up for a Developer Edition. Now you can start building on Salesforce for free and get hands-on with Agentforce and Data Cloud.
There's just one more step. Use the following link to reset the password for your Developer Edition. This link expires in 24 hours.
Reset Password
To easily log in later, save this URL:
https://orgfarm-198b993f7c-dev-ed.develop.my.salesforce.com
Here's the username for your Developer Edition:
sswethapreethi1206.48b1425b29a8@agentforce.com
Your Developer Edition, now enabled with Agentforce and Data Cloud, remains active as long as you continue to use it. It expires after 45 days of non-usage.

10. ADVANTAGES & DISADVANTAGES

Advantages

• Centralized CRM system
• Automated billing
• Reduced errors
• Improved customer engagement
• Real-time analytics

Disadvantages

• Requires Salesforce license
• Internet dependency
• Limited offline access

11. SUMMARY OF THE PROJECT

The project "A CRM Application for TheChaiShop&Co" was developed using Salesforce to automate and streamline business processes related to customer management and sales operations. The system includes custom objects, record types, validation rules, formula fields, automated email notifications, and interactive reports and dashboards. It ensures accurate billing, reduces manual errors, and enables real-time monitoring of sales activities. The CRM application improves productivity, supports better decision-making, and enhances customer engagement. Overall, the project successfully demonstrates how a cloud-based CRM solution can modernize business operations and support future scalability.

12. CONCLUSION

The CRM Application for TheChaiShop&Co successfully enhances business operations by automating customer management, billing, and reporting. The system minimizes errors, saves time, and improves customer satisfaction through personalized communication.

13. FUTURE SCOPE

• Mobile CRM integration
• AI-based sales prediction
• SMS/WhatsApp alerts
• Inventory management
• Multi-branch support

14. APPENDIX

• Salesforce Configuration
• Custom Objects & Fields
• Flows and Email Templates
• Reports & Dashboard
